

Instruction to Run the Code

Step 1: Install OpenCv & Numpy Library

```
pip install opencv-python  
pip install numpy
```

Step 2: You need a hard copy of the encryption key image or take that image to another device because we have to show that image to the webcam for feature matching.

Step 3: The encrypted image will start to augment on the encryption key image.

Step 4: Press 'n' for New Image
Press 'p' for previous Image

Step 5: Press 'i' for Zoom in
Press 'o' for Zoom out
